

EWDMXR - Wireless DMX Receiver

Specifications:

- Works with a EWDMX T-Transmitter
- Range up to 3000 ft.
- 1 Antenna
- 1 120v Power Supply
- FHSS Technology
- 3 & 5 Pin XLR
- 1 Bracket + Safety Cable
- 1 User Manual
- Size: 5" x 6.5" x 1.5"
- Weight: 1.6 lbs.
- Voltage: 90-250v (Voltage Switching Wall Wart)

What is FHSS?

W-DMX uses Adaptive Frequency Hopping Technology (FHSS) which changes frequency 1000 times per second and jumps only to channels that are not used by other W-LAN and/or other products on the 2.45 GHz band. This together with TDMA (Time Division Multiple Access) gives the user a guarantee for a much safer technology without interference. The technology was invented by the US Army and is used in the GSM networks as well.
